

CogniWerk.ai

Compliance Overview

EU AI Act · GDPR

CogniWerk is a generative AI platform for visual content production, built for European B2B marketing teams. This page covers the questions that come up first in a vendor review. Full documentation — sub-processor register, data processing agreement, and audit-trail detail — is available on request, and a complete DACH legal review typically takes three to five business days.

Legal entity	CogniWerk GmbH, Berlin, Germany
Service	Generative AI platform for visual content production (B2B SaaS)
AI Act classification	Limited-risk. Article 50 transparency obligations are addressed through automatic watermarking and a per-asset audit record on every generated image.
Data residency	Data at rest is held in the EU (Germany). The application layer runs in the EU (Frankfurt). A portion of live image-generation compute runs in the UK, covered by the European Commission's UK adequacy decision (December 2025) — this does not require additional transfer safeguards.
GDPR	Article 28 Data Processing Agreement available and signed as standard. EU Standard Contractual Clauses in place with sub-processors where applicable.
Security	Cybersecurity posture validated through a DAX-listed multinational's supplier vetting process (October 2025). ISO 27001 certification in progress; aligned with BSI C5 and BSI IT-Grundschutz.
Audit trail	Every generated asset carries an invisible watermark and a cryptographically signed provenance record (C2PA), plus an exportable audit PDF documenting the model, prompt, user, and timestamp.
Indemnification & liability	Governed by CogniWerk's standard Terms of Service. Engagement-specific terms can be discussed directly for larger deployments.
Standard review timeline	3 to 5 business days for a full documentation review.

Want the full picture?

The complete compliance pack covers the sub-processor register, the full data-processing breakdown, technical and organisational measures, and the detail behind the audit trail. Get in touch and we'll send it over — no commitment required.

This overview is accurate as of July 2026. For binding terms, refer to CogniWerk's Terms of Service or your signed agreement with CogniWerk.
